

RADIANT BARRIER

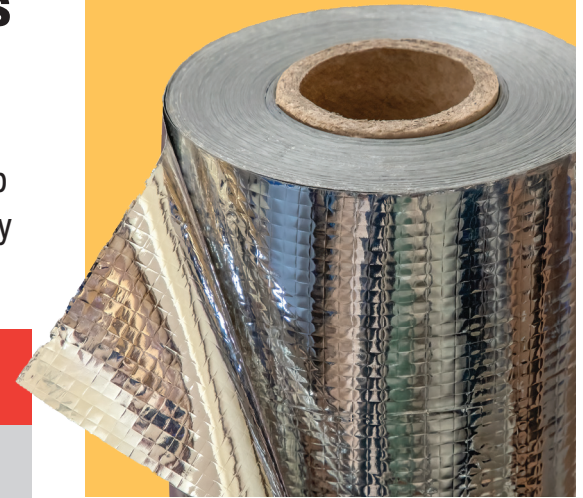

KHI-KHO Radiant Barrier installation can dramatically improve the effectiveness of insulation - keeping protected spaces cooler in summer, warmer in winter.

Made of woven polyethylene material covered by metalized film, our Radiant Barrier provides a solid reflective surface that blocks up to 95% of radiant heat. Improved thermal performance keeps energy costs lower while making interior spaces more comfortable.

TWO ROLL SIZES:

4' wide x 125' roll

6' wide x 125' roll

KHI-KHO Radiant Barrier Benefits:

- ▶ **Cuts energy consumption and costs**
- ▶ **Improves interior comfort**
- ▶ **Effective means of temperature control**
- ▶ **Blocks air and moisture penetration**
- ▶ **Superior tear and puncture resistance**
- ▶ **Can span up to 8 feet unsupported**
- ▶ **Environmentally friendly and non-toxic**
- ▶ **Lightweight and easy to install**

Great Solution for a Variety of Needs:

- ▶ **Metal Roofing**
- ▶ **Metal and Post Frame Buildings**
- ▶ **Storage and Agricultural Structures**
- ▶ **Ideal in New Construction or Retrofits**

TECHNICAL DATA

ASTM E84-10	Flame Spread	5
	Smoke Developed	20
ASTM E408	Reflectivity	95%
	Emissivity	6%
Tear Strength	MD	26.94 lbs.
	CD	30.04 lbs.
Thickness		4.0 mil
Weight		14 lbs./500 sq. ft.

WARNING: NEVER INSTALL PRODUCT OVER OR NEAR EXPOSED OR DEFECTIVE ELECTRICAL WIRING.
